## Trogir

## Adriatic4you - About Us

If you want to visit smaller and more private islands join us on our fish picnic to Drvenik and Šolta, two small islands near Trogir. On the other hand, if you're looking for a little bit more active day trips, don't worry, because we have that covered, too. Omiš is situated south from Split and it is very famous not only for its beauty but also for the river Cetina, where we organize rafting and canyoning. You can also enjoy the sea kayaking and snorkelling, diving, canoe safari and a lot of other possibilities that can be organized with the help of our staff.

All of our trips are fully organized, from transport and entrance tickets to professional guides and, in some cases, the equipment. Best thing is that you don't necessarily have to choose the type of vacation, you can simply share your wishes with us and we can make a perfect combination of everything – culture, nature and adventure.

Take a peek at some of our most popular tours.

Trogir and Split are two towns in Middle Dalmatia, both of them perfectly situated to go on one day trips to the most beautiful and interesting places of this area. Let us take you to visit those places. Here is something you can find in our offer when it comes to the daily tours. Come and join us!

If you want to visit the natural beauties of our country, we suggest you to join us on our tour of National Parks: NP Krka, NP Plitvice and NP Kornati. If you are more interested in the architecture, history and art we suggest our trips to Split, Dubrovnik and, of course, our beautiful Trogir, all of them officially being UNESCO localities. Something completely different is our trip to Međugorje and Mostar, a mixture of religions and history of Orient in Bosnia and Herzegovina. We believe that you've also heard about islands Hvar, Vis and Brač, where we can take you by various speedboats in order to introduce to you the picturesque island towns, beaches and breathtaking surroundings.

# NP KORNATI

## Description:

NP Kornati covers 140 islands and islets in one of the most beautiful parts of the Adriatic Sea, especially suitable for sailing. It is the bluest corner of the Adriatic where the blue color of the sea stands out even more in the contrast with white-grayish rocky ground which prevails on the islands. With its exceptionally clear sea, torrents of sunshine, numerous inlets, bays and small ports, Kornati are a must-see destination for boaters on their wanderings over the Adriatic and the perfect choice for modern Robinsons. This archipelago became National park in 1980 due to its stunning beauty, geomorphology and preserved eco systems. The Park covers the area of 220 km<sup>2</sup> and only 1/4 of it is on the mainland. This trip is a combination of land and sea. Our first stop is a small place Vodice, 80 km north from Trogir. Afterwards, you will experience a boat adventure, taste typical Dalmatian lunch, enjoy the sound of live music, visit natural park Telašćica and swim in the salty water of the Lake Mir.

Here, we will take a break to have lunch, swim and snorkel. But this isn't all this day has to offer. The Green Cave of Ravnik island, also known as the Monk Seal Cave, is the original home of the only existing seal species in the Adriatic. For those who enjoy adrenaline rush, jumping to the sea from cave's cliffs will definitely spice up the day. Heading toward our final destination for the day, the town of Hvar, we will enjoy a 45min cruise along an archipelago of 9 small island and islets, including Stoncica cape with a 100 years old lighthouse. ## Description:

This tour begins at a small place called Jakiruša - Brela. The beautiful Jakiruša bay is surrounded with the spectacular mountain of Biokovo. There is a sandy beach in Jakiruša, popular with the locals and tourists for swimming and on the west side there is a rocky coast and one of the last untouched bays in this part of the Riviera - bay Vrulja.

We launch our sea kayaks on the beach and paddle lightly towards the deserted sandy beaches of the Vrulja bay. We stop to observe the submarine groundwater source which brings 50 m<sup>3</sup> of drinking water per second to this place even in the summer. Our paddling will take us to the Vrulja beach where we pause to swim and snorkel in the crystal blue waters. After the kayaking adventure we can arrange a delicious meal in a local restaurant.
